Introduction

About Mekong Watch

Our vision is

for the people of the Mekong Region to benefit from the region's natural environments and sustain ways of life that are rooted in the integrity of their environments, without falling victim to the harmful impacts of destructive development.

Through dialogue, we can improve development projects and policies so as to prevent or ameliorate their negative impacts.

These are Mekong Watch's activities.

From the start of the 21st century, many development projects have been proposed, purportedly to eliminate poverty. To the socially vulnerable, in particular, the existence of a natural environment in which they can obtain food is critically important. The changes in society and the environment that accompany these development projects, however, can easily lead to environmental destruction and removal of the inhabitants, resulting in the loss of means of livelihood and places for the people to live. Development does not always benefit people financially, but runs the risk of depriving people of independence and forcing them into poverty.

While ascertaining the problems faced locally through direct dialogue with the people being harmed by development on the one hand, we reach out on the other hand to the people responsible for formulating and implementing development policies.

Mekong Watch's Initiatives

- 1. Information gathering and analysis on development policies, projects, and organizations that carry out development (development institutions, recipient country governments, private companies).
 - We analyze environmental impact assessments of dam, hydropower and other projects and investigate the environmental policies of countries in carrying out development.
- 2. Fostering understanding, developing resources on the environment and society.
 - We gather information on the lives of people residing in places where development is occurring and release it to the public in written or video form.
- 3. Gathering information, conducting analyses, and developing resources on development, including historical case studies.
 - We gather moral lessons from the impoverishment of residents and other negative effects that have resulted in the past from development projects and document these.
- 4. Communicating and networking with NGOs, citizens and persons involved in projects in the Mekong Region or in countries involved with aid and investment (including Japan).
 - We convey information on problems with development projects to NGOs and citizens of the countries in the Mekong Basin undergoing development and the countries executing or providing aid for these projects. In addition, we build cooperative relations with NGOs and citizens groups sharing our concerns and work with them to resolve issues.
- 5. Targeting our advocacy activities at development protagonists using the policies and programs of those same protagonists.
 - We utilize the systems of the Asian Development Bank and other institutions for expressing formal objections, conveying the views of the local people to development institutions, informing the public of problems and urging stronger movements toward having these institutions solve those problems.
- 6. Advocating for improvement in environmental and social consideration policies in Mekong countries via aid-providing countries and aid organizations.
 - Citizen's concerns are not reflected sufficiently in the policies of countries with weak governance. On the other hand, countries and organizations providing aid to the Mekong Region have opportunities to get involved in improving the environment-related policies of the countries they are aiding. By conveying the concerns of the residents to them and relaying past problems, we advocate for the application of Mekong countries' environmental policies as a tool for solving local problems.

Medium-term Goals (FY2022-FY2025)

- Increase the number of cases in which the lessons of past development are applied to projects in various stages of progress in the Mekong basin countries and surrounding areas and the views of those affected are respected.
- 2. Increase the number of cases in the Mekong basin countries in which environmental/social policies and programs improve in a way that reflects past lessons of development, the natural environment, and ways of life rooted in the integrity of that environment.
- 3. People affected by development in the Mekong basin countries take action to prevent or ameliorate harmful effects on their environment, society and human rights.
- 4. Increase the number of people who know about the past lessons of development, the natural environment, and people's lifestyles rooted in the integrity of their environments in the Mekong basin countries.

FY2023 Activities

Local Conditions and Changes Resulting from Mekong Watch Activities in FY2023

The World Meteorological Organization (WMO) has announced that 2023 was the hottest year in observational history, with the global average near surface temperature exceeding the pre-industrial baseline by 1.45°C (±0.12°C uncertainty). Thailand recorded 45.4°C in April; Vietnam, 44.2°C in May; and Laos, 43.5°C in May of that year. Each of these represented a new record high temperature for its respective nation. Myanmar was hit by the massive Cyclone Mocha in May 2023, resulting in many casualties. Since the coup d'etat in 2021, however, the Myanmar military has intensified its repression in the country, so it is not possible to get an overall picture of the state of damage and it appears that no progress is being made toward reconstruction. There has not been a sufficient response to climate change by Japan's government and enterprises. We teamed up with other organizations to request, for example, at the G7 meeting in 2023, which was chaired by Japan, that policies be aligned with the 1.5-degree target of the Paris Agreement.

Of the four environmental activists jailed in Vietnam, including Goldman Environmental Prize winner Nguy Thi Khanh, three were released in 2023 to everyone's surprise, but lawyer Dang Dinh Bach, who had been sentenced to five years in prison, still remained in prison. Additionally, another two people were arrested in 2023. These were Hoang Thi Minh Hong founder and director of an organization addressing climate change and wildlife protection issues, and green energy expert Ngo Thi To Nhien. Ms. Hong, like the four above, was found guilty of tax evasion (Article 200 of the Criminal Code) and jailed. In Vietnam, UN agencies have pointed out, tax evasion charges are used as a means of stifling critical voices. Ms. Nhien was reportedly being investigated for misappropriation of documents, but the situation after that has been unclear, including her trial date. The above-mentioned lawyer Bach has been appealing his innocence since his incarceration in June 2021, repeatedly going on hunger strikes, and his health has become a grave concern. The UN Special Rapporteur on the Right to Development has described the arrest and conviction of environmental activists as "a very serious issue that has the effect of discouraging independent NGOs from contributing to the Just Energy Transition Project (JETP)."

In Cambodia, the issues of relocation and compensation of indigenous ethnic minorities displaced by the Lower Sesan 2 Dam, which is operating in the northeastern part of the country, remain unresolved. We are engaging in discussions with local residents and NGOs and making efforts to resolve these issues, utilizing the environmental and social policies of international financial institutions that are providing indirect financing to this project.

In Myanmar, since the time of the military coup d'etat on 1 February 2021, at least 4,000 people have been killed (as of March 2024) as the result of violence and conflict with the security forces under the military junta's command. The number of fatalities is said in reality to be twice that. Japan, which has been Myanmar's largest donor country, has continued to provide

Official Development Assistance (ODA) even after more than three years have passed since the coup d'etat. Japan's ODA yen-loan projects in Myanmar, totaling more than 7 trillion yen, continue being implemented. To demand that Japan's government change its policies, we continued disseminating information through online signature campaigns, actions and webinars in this fiscal year. We also approached 30 Japanese companies that had been receiving orders for yen loan projects, asking them about the status of their implementation of human rights due diligence, and we released their responses to the public. Aside from ODA, the Japan Overseas Infrastructure Investment Corporation for Transport & Urban Development (JOIN) under the jurisdiction of the Ministry of Land, Infrastructure, Transport and Tourism has invested, and the Japan Bank for International Cooperation (JBIC) under the jurisdiction of the Ministry of Finance has supplied financing to a mixed-use real estate project in Yangon, Myanmar's largest city, using public funds. Leasing fees on the land in this project are paid to the Office of the Quartermaster General that oversees military logistics in Myanmar, sothe payments have been temporarily halted as a result of protests from various quarters. We will continue in the next fiscal year to raise this issue by investigating and disseminating information on projects supportive of the military junta and through actions in collaboration with citizens' groups to appeal to the public and policy makers.

The effects of global warming are manifesting in all parts of the Mekong Basin and are impacting biodiversity. Even under those conditions, dam construction on the main stream and tributaries of the Mekong River continues in Laos, adversely affecting the rivers' ecosystems. In Thailand, which has taken the lead in advancing development, the degradation of ecosystems along the rivers is already evident. We conducted surveys to promote ecosystem-aware water management and disseminated information through videos in the middle reaches of the Mun River basin in Thailand. In the final year of the project, we compiled recommendations with local groups for protecting the wetland forests along the river.

A. Investigative Research

Mekong Watch engages in two types of investigative research. The first is monitoring of projects and programs for potential threats to people who rely on natural resources. In recent years, we have begun monitoring corporate activity amid the rise of private sector-led development projects. The second is field research (not limited to that involved in specific development projects) conducted in cooperation with local residents to collect basic data and deepen overall understanding of the connection between the environment and people's lives. The information and knowledge gained from this research form the basis of our advocacy work.

A-1. Project Monitoring

Continuing from the previous fiscal year, we kept monitoring developments such as to stop the flow of funds from Japan to the Myanmar military and coal-fired power plant projects funded by JBIC. Monitoring activities of FY2023 are listed below. Countries/organizations providing or considering providing funds are indicated in parentheses. For further details on any of the projects, see Mekong Watch's website. http://www.mekongwatch.org/report/index.html)

[Myanmar (Burma)]

"#No More Business with the Myanmar Junta"

Since the military coup d'etat in Myanmar on 1 February 2021, the numbers of internally displaced people continue to grow, and are estimated to have surpassed 2.6 million in February 2024. In addition, government officials and many citizens calling for democratization continue to be unjustly detained.

This fiscal year, we continued to work with various citizens' groups, including the "#No More Business with the Myanmar Junta" campaign group (ayus: Network of Buddhists Volunteers on International Cooperation, Friends of the Earth Japan, Japan International Volunteer Center (JVC) and Network Against Japan Arms Trade (NAJAT), in addition to Mekong Watch), to stop the flow of funding from Japan to the Myanmar military, and to ensure the citizens' safety and security, we regularly made survey-based recommendations and appealed in front of the Prime Minister's Office and Ministry of Foreign Affairs. In addition, to enquire into companies' human rights considerations, we sent questionnaires to 30 Japanese companies that had received orders for ODA yen-loan projects asking them about the status of their implementation of human rights due diligence.

This fiscal year, we issued the following letters of request and press releases.

[Press Release] Serious questions over the withdrawal of ENEOS Holdings and other entities from the Yetagun gas project (April 17, 2023)

[Open Letter] Japan's leadership urgently needed at the UN Security Council to stop Myanmar military's atrocity crimes as Myanmar faces man-made and natural disasters (May 29, 2023)

[Press Release] Japan's Special Envoy for National Reconciliation in Myanmar Lacks Accountability and Transparency (May 31, 2023)

[Open Letter] United States Sanctions Myanmar Junta's Ministry of Defence - Japanese Government Should Immediately and Completely Withdraw from the Y Complex Project (July 25, 2023)

[Letter of Request] Once again requesting the Japanese Government to halt ODA to Myanmar (October 3, 2023)

[Joint Statement] Statement calling on the Japanese government to stop ODA and publicly-funded projects benefiting the Myanmar military (December 1, 2023)

[Press Release] Questionnaire on human rights consideration in Myanmar sent to companies receiving orders for ODA yen-loan projects (January 30, 2024)

[Press Release] Responses to questionnaire on human rights consideration in Myanmar sent to companies receiving orders for ODA yen-loan projects (March 8, 2024)

We have established a "#No More Business with the Myanmar Junta" page at our website that summarizes our activities to date. Please refer to it (in Japanese). http://www.mekongwatch.org/report/burma/mbusiness.html

Other Projects:

- Thilawa Special Economic Zone (JICA)
- Dawei Special Economic Zone (JBIC, Thai and Japanese private sectors, others)

[Laos]

Xayaburi Dam on the Mekong Mainstream (Thai private sector)

[Thailand]

- Thai Overseas Investment Projects in Mekong Basin Countries (Thai private sector)
- Projects related to Asia Zero Emission Community (Thai and Japanese Government/ Thai and Japanese private sector)

[Cambodia]

Lower Sesan 2 Hydropower Project (Chinese and Cambodian private sector, others)

[Vietnam]

Vietnam declared in 2021 that it would achieve net-zero greenhouse gas emissions by 2050, signing a statement that it would phase out coal-fired power generation in the 2040s (or as soon as possible thereafter). In 2022, the donor nation group, which includes Japan, and the Vietnamese government announced the launch of the Just Energy Transition Partnership (JETP) with the goals of accelerating the early retirement of infrastructure with high greenhouse gas emissions and promoting the introduction of renewable energy. In 2023, JETP announced its Resource Mobilization Plan (JETP-RMP). Nevertheless, the Van Phong coal-fired power plant, to which Japan's public and private sectors have contributed, began commercial operation in 2024, and construction of the Vung Ang 2 plant has proceeded uninterrupted. Moreover, although the International Energy Agency (IEA) has indicated that for the world to stay on path to net zero by 2050 it has no room for new gas field development, Japan's public and private sectors keep trying to push the development of offshore gas field Block B forward, clearly deviating from that path. Japan's public and private sectors are also involved in the planning of several liquefied natural gas (LNG) projects.

- Hai Phong Coal-Fired Power Plant (JBIC)
- Vinh Tan 4 and 4 Extension Coal-Fired Power Plants (JBIC)
- Nghi Son 2 Coal-Fired Power Plant (JBIC)
- Van Phong Coal-Fired Power Plant (JBIC)
- Vung Ang 2 Coal-Fired Power Plant (JBIC)
- Block B- O Mon Project (Upstream and Midstream)(JOGMEC, JBIC)

A-2. Research

We gathered information regarding human rights issues in the Mekong Basin in preparation for conducting a survey in the coming fiscal year.

B. Field Projects

Our field projects consist of activities aimed at understanding the state of natural resources of inhabitants of countries of the Mekong Basin. We document the people's ways of living with nature and help residents of the region manage their natural resources.

♦Information dissemination and advocacy on the establishment of community-based sustainable water resource management in the Mun River Basin in Thailand

In the middle reaches of the Mun River (Surin, Sisaket and Roi Et provinces of northeastern Thailand), a major tributary of the Mekong, the river floods for three to four months each year, and a flood forest particular to this region spreads broadly. Previously, this inundated forest was extremely important as a spawning ground for Mekong River fish, but the construction of multiple dams on the Mun River has blocked the migration route of living creatures, cutting them off from the Mekong River ecosystem. Even so, its environment is still good enough in places that certain fish species can still be caught there that are rare in the Mekong and lower reaches of the Mun River.

Regarding the future, protection of the fish and flood forests is considered extremely important toward the time when the Mekong and Mun Rivers are connected once again. However, excavation of sand for construction, erection of levees with no consideration for living things and removal of riverbank vegetation for development occur frequently in this region. In addition, due to lifestyle changes, imparting local wisdom to the next generation is also an important task.

In these settlements in the middle river basin, activities implemented from FY2021 have included (1) participatory surveys for clarifying the importance of local geography, ecology, river culture and livelihoods (economies) and the interrelationships among them, (2) production of videos about each of those topics, (3) dissemination via social media and (4) video screenings in cooperation with university researchers for students and interaction with residents' groups in other regions.

This fiscal year, which is the final one, we established a venue for residents to exchange views with governmental departments such as the Department of Water Resource of the Ministry of Natural Resources and Environment, provincial fisheries offices and the irrigation offices in charge of the middle Mun River basin. In addition, we produced a proposal document in Thai language based on the knowledge and views we had learned through our surveys thus far. We also participated in a cycling event held by the local citizens' group "Association of Esan Fresh Water Fishery Community (Sisaket)" to appeal through cycling for protection of the Mun River environment, and held a seminar to share information as part of the event.

The cycling event.

Participants at a seminar held in Don Raet Sub-district, Rattanaburi District, Surin Province.

We produced videos with our local collaborators, who played a central role, and we established the following Facebook pages.

Wetlands of ISAN (Facebook pages in Thai) https://www.facebook.com/wetlandlsan

Mekong Watch YouTube channel https://www.youtube.com/user/mekongwatch/videos

Wisdom of the Tharm Forest—the Sae Bai River (in Thai) https://youtu.be/V7vDiP0M-4M

Vulnerable populations impacted by large-scale development (in Thai) https://www.youtube.com/watch?v=9mtalpZDUso

C. Outreach in Japan and Abroad

♦Seminars and lectures

Our seminars and lectures communicate the problems of development and the environment in Mekong basin countries to the general public. In FY2023, we held seven seminars and other events related to Myanmar, plus two seminars on global warming countermeasures and one on Thailand. We also participated in seminars held by human rights NGOs and others addressing business and human rights.

(For a summary of our seminars and lectures, see Appendix 1.)

♦ Official magazine, Forum Mekong

To increase the reach of Forum Mekong, we transitioned to digital-only distribution. Our back issues are also available online in PDF format.

Continued publication is what we need to achieve.

♦Mekong River development e-mail newsletter

Mekong Watch disseminates news on development and environmental issues in the Mekong region via an e-mail newsletter. In FY2022, we issued nine newsletters in Japanese.

Also, in collaboration with other NGOs, we issued a total of 31 messages, including press releases and letters of request, on policies regarding aid to climate change countermeasures being taken by the Japanese public and private sectors.

♦Website

Difficulty keeping pace with the large number of issues occurring in the Mekong basin and making updates on them quickly, together with thoroughly updating our English website continue to be tasks for us. We continue to make use of Facebook and X to help spread information.

♦Providing lecturers and publishing research

We sent our staff to give talks on Mekong River development, the environment, and ODA at lectures and seminars (see Appendix 2). In FY2023, our staff gave 50 lectures at universities and six public lectures including webinar.

♦Media outreach

The goal of our media outreach is not to attract coverage of Mekong Watch's activities, but to increase coverage of the development issues we are concerned about. Mekong Watch was involved in the creation of 28 media stories in this fiscal year.

* Mekong Library: Previously opened to provide information Mekong Watch had gathered to the public, our library is closed for the time being. At our urging for information disclosure to civil society, many international aid organizations have started providing information on the Internet. For this reason, we determined that it was less necessary for us to disclose information we had gathered. We are accepting inquiries about individual items of documentation from the past.

D. Advocacy

Our advocacy has three objectives: (1) improve individual aid projects; (2) question development in the Mekong basin countries; and (3) encourage the Japanese government to reflect past experience in ODA and other policies and processes.

♦Revision of NEXI Guidelines for Environmental and Social Considerations

Public comments were solicited on the revised proposal and Mekong Watch also submitted its opinion.

◆Revising the Asian Development Bank's (ADB's) Environmental and Social Safeguard Policies

The ADB has announced a new policy proposal, but at its very core it has issues, such as a high likelihood that the Board of Directors will allow projects to proceed without adequate environmental and social considerations. We will work with NGOs in Asian countries to ensure that the ADB's social and environmental conservation policies are not compromised.

♦ Revisions to the Development Cooperation Charter

The Japanese Ministry of Foreign Affairs announced on September 9 in 2022 that it would be revising its Development Cooperation Charter, which puts forth its basic concept of official development assistance (ODA). However, the place and function of the Panel of Experts, which was established in a hurry for these revisions, are unclear, and progress is being made on these revisions despite insufficiencies in the process for reflecting the diverse views of civil society in the revisions remaining. The new guidelines were released in FY2023 and public comments were solicited, but now, not only are requests being received from recipient countries as before, but important changes have also been decided on, such as "offer-type cooperation" in which Japan intends to propose aid to recipient countries, without sufficient discussion.

♦Improving individual projects

We held meetings (detailed below) with JICA, the Ministry of Foreign Affairs (MOFA), and the Ministry of Finance (MOF) on individual aid projects, with the aim of pushing for improvements to problems we identified through our project monitoring activities. The agendas for our regularly held meetings with MOF can be found in Appendix 5.

Audit Report

I have audited the FY2023 (April 1, 2023 – March 31, 2024) financial reports of Mekong Watch, an incorporated non-profit organization (NPO) in Japan.

The audit was conducted in accordance with the Accounting Standard of NPOs in Japan. I acknowledge that Mekong Watch's activities were conducted appropriately and that its financial statements and balance sheet were prepared according to legal principles.

Also, I hereby note that upon auditing, an Audit Checklist for NPOs, designed to review internal procedures of the financial management of NPOs in Japan and overseas was also used. These checkpoints include, 1) whether the organization abided by spending procedure rules, 2) whether personnel expenses were paid according to the rules and legally required records were kept, and 3) evidence of expenses were appropriately filed and stored. I performed a review those points including and found no violation of rules or particular instances to report.

Thus, I hereby acknowledge that the organization's internal control this fiscal year was acceptable.

May 23, 2024

Miki Ikeda
